| Category                   | Biochemikalien                                                                                           |
| Application                | SDS-PAGE                                                                                                 |
| Conjugation                | OVA                                                                                                      |
| Concentration              | Prior to lyophilization: 200 µg/ml                                                                       |
| Molecular Weight           | Unconjugated MW: 226.23 g/mol                                                                            |
| Buffer                     | Prior to lyophilization: PBS, pH 7.4, containing 0.01% Sarcosyl, 1 mM DTT, 5% Trehalose and Proclin-300. |
| Expression System          | Synthetic                                                                                                |
| Purity                     | > 95%                                                                                                    |
| Form                       | Lyophilized                                                                                              |
| Target                     | Carnosine (Car)                                                                                          |
