| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse SP-D. Standards or samples are added to the micro ELISA plate wells and combined with the specific ant... |
| Range                      | 31.2-2000pg/mL                                                                                                                                                                                                                                                |
| Sensitivity                | 12.7pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum, plasma and other biological fluids                                                                                                                                                                                                                     |
| Target                     | SP-D                                                                                                                                                                                                                                                          |
