| Category                   | Biochemikalien                                                                                          |
| Product Description        | Indigo carmine is an efficient reagent for the determination of ozone by chemilluminescence (CL)[1].... |
| Molecular Weight           | 466.35                                                                                                  |
| Purity                     | 98                                                                                                      |
| CAS Number                 | [860-22-0]                                                                                              |
| Formula                    | C <sub>16</sub> H <sub>8</sub> N <sub>2</sub> Na <sub>2</sub> O <sub>8</sub> S <sub>2</sub>             |
| Target                     | Fluorescent Dye                                                                                         |
| Application Notes          | MCE Product type: Dye Reagents                                                                          |
