| UniProt                    | <a href="#">Q9R1T7</a>                                                                                                                                                                                               |
| Expression System          | HEK293 Cells                                                                                                                                                                                                         |
| Purity                     | > 95 % as determined by reducing SDS-PAGE.                                                                                                                                                                           |
| Form                       | Lyophilized from sterile PBS, pH 7.4. Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual. |
| Sequence                   | Met1-Leu142                                                                                                                                                                                                          |
