| Category                   | Biochemikalien                                                                                                                              |
| Product Description        | N-Isobutyryl-L-cysteine serves as a chiral derivatizing agent that is extensively utilized for the separation of amino acid enantiomers.... |
| Molecular Weight           | 191.25                                                                                                                                      |
| CAS Number                 | [124529-02-8]                                                                                                                               |
| Formula                    | C7H13NO3S                                                                                                                                   |
| Target                     | Biochemical Assay Reagents,Endogenous Metabolite                                                                                            |
| Application Notes          | MCE Product type: Reference compound                                                                                                        |
