| Species Reactivity         | Human, Mouse, Rat                                                                                                                                                                                                        |
| Conjugation                | PE/Cy7                                                                                                                                                                                                                   |
| Product Description        | This gene encodes a serine-type endopeptidase with chymotrypsin- and elastase-2-like activities. The gene encoding this zymogen is expressed specifically in the pancreas and likely functions as a digestive enzyme.... |
| Clonality                  | Recombinant                                                                                                                                                                                                              |
| Concentration              | Lot dependent                                                                                                                                                                                                            |
