| Product Description        | KCC-07 is a potent, selective and brain-penetrant MBD2 (methyl-CpG-binding domain protein 2) inhibitor. KCC-07 prevents binding of MBD2 to methylated DNA and activates brain specific angiogenesis inhibitor 1 (BAI1) inducing anti-proliferative BAI1/p5... |
| Molecular Weight           | 269.32                                                                                                                                                                                                                                                        |
| Purity                     | 99.0%                                                                                                                                                                                                                                                         |
