| Category                   | Proteine/Peptide                                                         |
| Tag                        | The tag type will be determined during production process.               |
| UniProt                    | <a href="#">P67894</a>                                                   |
| Buffer                     | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                              |
| Source                     | E.coli                                                                   |
| Purity                     | Greater than 85% as determined by SDS-PAGE.                              |
| Form                       | Lyophilized powder                                                       |
| Sequence                   | LAAVSVCSE YPKACTMEY RPLCGSDNKS YDNKCNFCNA VVESNGTLTL SHFGKC              |

Application Notes

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
