| Product Description        | mPEG-N3 (MW 1000) can be used to modify proteins, peptides, and other materials. The azide group can react with alkynes in aqueous solution catalyzed by copper. It can also be easily reduced to an amine group. PEGylation can increase solubility and s... |
| Molecular Weight           | 1000 (Average)                                                                                                                                                                                                                                                |
| Target                     | Biochemical Assay Reagents                                                                                                                                                                                                                                    |
| Application Notes          | MCE Product type: Biochemical Assay Reagents                                                                                                                                                                                                                  |
