| Category                   | Molekularbiologie                                                                                                                                                                                                                                        |
| Product Description        | Human IL33 mRNA encodes the human interleukin 33 (IL33) protein, a cytokine that binds to the IL1RL1/ST2 receptor. IL33 is involved in the maturation of Th2 cells and the activation of mast cells, basophils, eosinophils and natural killer cells.... |
| Target                     | mRNA                                                                                                                                                                                                                                                     |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                       |
