| Product Description        | Human CXCR5 mRNA encodes the human C-X-C motif chemokine receptor 5 (CXCR5) protein, a multi-pass membrane protein that belongs to the CXC chemokine receptor family. CXCR5 is involved in B-cell migration into B-cell follicles of spleen and Peyer patc... |
| Target                     | mRNA                                                                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                                                                                                                                                            |
