| Category                   | Biochemikalien                                                                                                               |
| Product Description        | 5(E)-VP-2-OMe-Bz-C Phosphoramidite is a phosphoramidite monomer used in nucleic acid synthesis, such as oligonucleotides.... |
| Molecular Weight           | 865.84                                                                                                                       |
| Formula                    | C39H57N5O13P2                                                                                                                |
| Target                     | DNA/RNA Synthesis                                                                                                            |
| Application Notes          | MCE Product type: Oligonucleotides                                                                                           |
