Product Datasheet

CD79B , Human (HEK293, His) Preis auf Anfrage MCE-HY-P704492

Article Name	CD79B , Human (HEK293, His) Preis auf Anfrage
Biozol Catalog Number	MCE-HY-P704492
Supplier Catalog Number	HY-P704492
Alternative Catalog Number	MCE-HY-P704492-100UG
Manufacturer	MedchemExpress
Category	Proteine/Peptide
Product Description	CD79B protein binds to CD79A and initiates the B cell antigen receptor complex (BCR) signaling cascade. This results in complex internalization, transport to late endosomes and antigen presentation. CD79B Protein, Human (HEK293, hFc) is the recombinant protein expressed in HEK293 cells. It is a single chain polypeptide with a molecular weight of approximately 55-65 kDa. The protein contains a signal sequence, a transmembrane domain, and a cytoplasmic domain. The extracellular domain contains two immunoglobulin-like domains. The protein is expressed with a His tag at the C-terminus. The protein is recombinant and expressed in HEK293 cells. It is a single chain polypeptide with a molecular weight of approximately 55-65 kDa. The protein contains a signal sequence, a transmembrane domain, and a cytoplasmic domain. The extracellular domain contains two immunoglobulin-like domains. The protein is expressed with a His tag at the C-terminus.
Molecular Weight	Approximately 55-65 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.
Formula	974(Gene_ID)P40259 (A29-D159)(Accession)
Application Notes	MCE Product type: Recombinant Proteins
