| Product Description        | Fluorescent VLP with a GFP tag, self-assembles from viral envelope/capsid proteins, serving as a control for VLPs displaying membrane proteins. Formed in HEK293 cultures, these VLPs concentrate membrane proteins on the cell surface, producing high-co... |
| Formula                    | /(Gene_ID)/(Accession)                                                                                                                                                                                                                                        |
