| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | Pirh 2 (P53 induced RING-H2 protein), also known as RCHY1, it forms dimers through its N- and C-terminus in cells. The Pirh2 has ubiquitin-protein ligase activity and it binds with p53 and promotes the ubiquitin-mediated proteosomal degradation of p5... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | 30kDa, 60kDa (homodimer)                                                                                                                                                                                                                                      |
