| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | ADP-ribosylation factor 1 (ARF1) is a member of the human ARF gene family. The family members encode small guanine nucleotide-binding proteins that stimulate the ADP-ribosyltransferase activity of cholera toxin and play a role in vesicular traffickin... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | 20.7kDa                                                                                                                                                                                                                                                       |
