| Product Description        | HMG-I/Y bind preferentially to the minor groove of A+T rich regions in double stranded DNA. It is suggested that these proteins could function in nucleosome phasing and in the 3-end processing of mRNA transcripts. They are also involved in the transc... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | Calculated MW: 12 kDa, Observed MW: 18 kDa                                                                                                                                                                                                                    |
