| Tag                        | Tag type will be determined during the manufacturing process.<br>(Note:If you have specified tag type, please tell us or remark on your PO and we will develop the specified tag preferentially.)                           |
| UniProt                    | <a href="#">P0DN81</a>                                                                                                                                                                                                      |
| Buffer                     | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 20%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose. |
| Purity                     | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                 |
| Form                       | Liquid or Lyophilized powder                                                                                                                                                                                                |

| Application Notes | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
