| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | VCP proteins are indispensable for Golgi stack dynamics, coordinating fragmentation during mitosis and postmitotic reorganization. It actively promotes the formation of the transitional endoplasmic reticulum (tER), enables ATP-dependent vesicle buddi... |
| Molecular Weight           | Approximately 120 kDa                                                                                                                                                                                                                                         |
| Formula                    | 7415(Gene_ID)P55072/NP_009057.1 (A2-G806)(Accession)                                                                                                                                                                                                          |
| Application Notes          | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
