| Category                   | Kits/Assays                                                                                                                   |
| Species Reactivity         | Human                                                                                                                         |
| Product Description        | RayBio Human Immunoquantitative (PCR-Based) Annexin A5 ELISA Kit for cell culture supernatants, plasma, and serum samples.... |
| Range                      | 3.26 pg/mL - 6,000 pg/mL                                                                                                      |
| Sensitivity                | 3.26 pg/mL                                                                                                                    |
| NCBI                       | <a href="#">308</a>                                                                                                           |
| Form                       | 96-well Microplate                                                                                                            |
| Samples                    | Cell Culture Supernatants, Plasma, Serum                                                                                      |
| Target                     | Annexin A5 (Annexin V / ANXA5)                                                                                                |
| Application Dilute         | 2 to 3 fold                                                                                                                   |
| Application Notes          | qPCR                                                                                                                          |
