Recombinant Mouse Htra1 Protein, HEK293 Supernatant RAY-230-20010-200

| | |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Article Name | Recombinant Mouse Htra1 Protein, HEK293 Supernatant |
| Biozol Catalog Number | RAY-230-20010-200 |
| Supplier Catalog Number | 230-20010-200 |
| Alternative Catalog Number | RAY-230-20010-200 |
| Manufacturer | RayBiotech |
| Category | Proteine/Peptide |
| Species Reactivity | Mouse |
| Product Description | Recombinant mouse Htra1 overexpression cell culture supernatant (Serum Free), derived from the transfected HEK293 cells.... |
| Molecular Weight | Recombinant protein product has a calculated molecular mass of 50 kDa. The actual molecular weight may increase slightly due to the potential post-translational modifications (PTMs). |
| Tag | His |
| Expression System | HEK293 cells |

| | |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity | Unpurified cell culture supernatant. HEK293 cells grown in serum-free medium were transfected with expression vector harboring target gene. The cell culture was harvested with centrifugation to remove cells. The cell culture supernatant containing mammalian cell protease inhibitor cocktail was aliquoted and stored at -80C immediately. The gene overexpression in culture supernatant was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the culture supernatant derived from HEK293 cells transfected with the empty expression vector was used as a negative control. |
| Form | Pink liquid |
| Sequence | Leu23-Pro480 |
| Formula | Serum-free cell culture supernatant, clarified from transfected HEK293 cells. |
