| Category                   | Proteine/Peptide                                                                                                                                                                                                                                               |
| Species Reactivity         | Virus                                                                                                                                                                                                                                                          |
| Product Description        | Recombinant SARS-CoV-2 S1 Subunit Protein (RBD) mutant N501Y with C-terminal His-tag, derived from the transfected human HEK293 cells....                                                                                                                      |
| Concentration              | Lot specific (see the label on the vial), determined by BCA protein assay                                                                                                                                                                                      |
| Molecular Weight           | Recombinant protein product has a calculated molecular mass of 25 kDa. Due to the abundant glycosylation, it migrates as approximately 30 kDa protein band in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions. After deglycosylation under native |
| Tag                        | His                                                                                                                                                                                                                                                            |
| Expression System          | HEK293 cells                                                                                                                                                                                                                                                   |
| Purity                     | SDS-PAGE under reducing conditions and visualized by Coomassie blue staining                                                                                                                                                                                   |
| Form                       | Liquid                                                                                                                                                                                                                                                         |

|          |                                                                 |
|----------|-----------------------------------------------------------------|
| Sequence | Arg319-Phe541. Amino acid Asn (N501) was mutated to Tyr (Y501). |
| Formula  | Supplied as a 0.2 µm filtered solution in PBS (pH 7.4)          |
