| Manufacturer               | RayBiotech                                                                                                                                                                                                                                                      |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                                |
| Species Reactivity         | Virus                                                                                                                                                                                                                                                           |
| Conjugation                | Biotin                                                                                                                                                                                                                                                          |
| Product Description        | Biotin-conjugated recombinant SARS-CoV-2 S1 subunit protein RBD, mutant R346K with C-terminal His-tag, derived from the transfected human HEK293 cells....                                                                                                      |
| Concentration              | Lot specific (see the label on the vial), determined by BCA protein assay                                                                                                                                                                                       |
| Molecular Weight           | Recombinant protein product has a calculated molecular mass of ~25 kDa. Due to the abundant glycosylation, it migrates as approximately ~30 kDa protein bands in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions. After deglycosylation under nati |
| Tag                        | His                                                                                                                                                                                                                                                             |
| Expression System          | HEK293 cells                                                                                                                                                                                                                                                    |

|          |                                                                                         |
|----------|-----------------------------------------------------------------------------------------|
| Purity   | SDS-PAGE under reducing conditions and visualized by Coomassie blue staining            |
| Form     | Liquid                                                                                  |
| Sequence | Arg319-Phe541. R346K mutant: amino acid Arg (R) at 346 position was mutated to Lys (K). |
| Formula  | Supplied as a 0.2 µm filtered solution in PBS (pH 7.4)                                  |
