| Product Description        | Gamma-secretase modulator 2 is a potent, selective compound for the treatment of Alzheimers disease, specifically designed to modulate gamma-secretase activity. This modulation selectively attenuates the production of Abeta(1-42), addressing diseases... |
| Molecular Weight           | 514.47                                                                                                                                                                                                                                                        |
