| Manufacturer               | TargetMol                                                                                                                                                                       |
| Category                   | Biochemikalien                                                                                                                                                                  |
| Product Description        | Catalyzes site-specific recombination between two 34-base-pair LOXP sites. Its role is to maintain the phage genome as a monomeric unit-copy plasmid in the lysogenic state.... |
| Molecular Weight           | 46.0 kDa (predicted)                                                                                                                                                            |
