| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Single-stranded DNA-dependent ATP-dependent helicase that plays a key role in DNA non-homologous end joining (NHEJ) by recruiting DNA-PK to DNA. Required for double-strand break repair and V(D)J recombination. Also has a role in chromosome translocat... |
| Molecular Weight           | 30.4 kDa (predicted)                                                                                                                                                                                                                                          |
