| Product Description        | Inactivates phosphinothricin (PPT) by transfer of an acetyl group<br>from acetyl CoA. This enzyme is an effector of phosphinothricin<br>tripeptide (PTT or bialaphos) resistance. Phosphinothricin N-<br>acetyltransferase Protein, <i>S. viridochromogenes</i> , Recombinan... |
| Molecular Weight           | 22.6 kDa (predicted)                                                                                                                                                                                                                                                            |
