| Product Description        | 2-Amino-5-methyl-5-hexenoic acid ((S)-2-Amino-5-methylhex-5-enoic acid) acts as a methionine analog, competing with methionine and thereby hindering cell growth. This compound inhibits protein synthesis in Salmonella typhimurium TA1535 and Escherichi... |
| Molecular Weight           | 143.184                                                                                                                                                                                                                                                       |
