| Product Description        | Tubulin polymerization-IN-76 (compound 20b) is a potent and orally active inhibitor of tubulin polymerization. It acts at the colchicine binding site to inhibit tubulin polymerization with an IC50 value of 2.505 µM, effectively disrupting the intrace... |
| Molecular Weight           | 363.48                                                                                                                                                                                                                                                        |
