| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Parvalbumins (PVALBs) are particularly abundant in the fast-contracting muscles and correlate positively with muscle relaxation speed in amphibians and fishes. The loss of PVALB plays a role in the pathogenesis of thyroid tumors. The mutations in the... |
| Molecular Weight           | 14.3 kDa (predicted), 15-19 kDa (reducing conditions)                                                                                                                                                                                                         |
