| Category                   | Biochemikalien                                                                                                                                                             |
| Product Description        | MD1 Protein, Mouse, Recombinant (His) is expressed in HEK293 mammalian cells with His tag. The predicted molecular weight is 18 kDa and the accession number is O88188.... |
| Molecular Weight           | 18 kDa (predicted), 24-30 kDa (reducing condition, due to glycosylation)                                                                                                   |
