| Manufacturer               | TargetMol                                                                                                                                                                          |
| Category                   | Biochemikalien                                                                                                                                                                     |
| Product Description        | VCAM-1 Protein, Human, Recombinant (hFc) is expressed in HEK293 mammalian cells with hFc tag. The predicted molecular weight is 100.8 kDa and the accession number is P19320-1.... |
| Molecular Weight           | 100.8 kDa (predicted), 116.3 kDa (reducing condition, due to glycosylation)                                                                                                        |
| Purity                     | 95.60%                                                                                                                                                                             |
