| Category                   | Biochemikalien                                                                                                                                                                 |
| Product Description        | JAM-A Protein, Human, Recombinant (His) is expressed in HEK293 mammalian cells with His tag. The predicted molecular weight is 24 kDa and the accession number is Q9Y624-1.... |
| Molecular Weight           | 24 kDa (Predicted), 28-35 kDa (Due to glycosylation)                                                                                                                           |
