| Manufacturer               | TargetMol                                                                                                                                                                                     |
| Category                   | Biochemikalien                                                                                                                                                                                |
| Product Description        | IL-11R alpha/IL-11RA Protein, Mouse, Recombinant (His) is expressed in HEK293 mammalian cells with His tag. The predicted molecular weight is 39.2 kDa and the accession number is Q64385.... |
| Molecular Weight           | 39.2 kDa (predicted), 45-50 kDa (reducing condition, due to glycosylation)                                                                                                                    |
| Purity                     | 0.929                                                                                                                                                                                         |
