| Manufacturer               | TargetMol                                                                                                                                                                                     |
| Category                   | Biochemikalien                                                                                                                                                                                |
| Product Description        | gp130/IL6ST Protein, Rat, Recombinant (His & mFc) is expressed in HEK293 mammalian cells with His, mFc tag. The predicted molecular weight is 94.3 kDa and the accession number is H9BFG4.... |
| Molecular Weight           | 94.3 kDa (predicted), 130 kDa (reducing condition, due to glycosylation)                                                                                                                      |
