| Manufacturer               | TargetMol                                                                                                                                                               |
| Category                   | Biochemikalien                                                                                                                                                          |
| Product Description        | SARS-CoV-2 Spike RBD Protein (F456L, His) is expressed in HEK293 mammalian cells. The predicted molecular weight is 26.5 kDa and the accession number is A0A6G7K2L4.... |
| Molecular Weight           | 26.5 kDa (predicted), 35.1 kDa (reducing condition, due to glycosylation)                                                                                               |
