| Alternative Catalog Number | TGM-T37520-500MG                                                                                                                                                                                                            |
| Manufacturer               | TargetMol                                                                                                                                                                                                                   |
| Category                   | Biochemikalien                                                                                                                                                                                                              |
| Product Description        | DL-Glutamic acid, the conjugate acid of Glutamic acid, serves as a crucial metabolite. In comparison to the alpha and beta polymorphs of L-Glutamic acids second phase, DL-Glutamic acid exhibits enhanced stability[1].... |
| Molecular Weight           | 147.13                                                                                                                                                                                                                      |
| CAS Number                 | [617-65-2]                                                                                                                                                                                                                  |
| Formula                    | C5H9NO4                                                                                                                                                                                                                     |
| Target                     | Endogenous Metabolite   Others                                                                                                                                                                                              |
