## Product Datasheet

**Bcl-X (Apoptosis regulator Bcl-X, B cell lymphoma 2 like, BCL XL/S, Bcl-2-like protein 1, Bcl2-L-1, BCL2L, Bcl2l1, BCLX, BclXL, BclXs, Protein phosphatase 1 regulatory subunit 52 (PPP1R52)) (FITC), Clone: [BX006 2H12], Mouse, Mono  
USB-168649-AF-FITC**

|                            |                                                                                                                                                                                                                                                               |

| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FC, IF, IHC, IP, WB                                                                                                                                                                                                                                           |
| Immunogen                  | A synthetic peptide, aa 3-14 (Cys-QSNRELVVDFLS) of human Bcl-X protein (BX006 & 2H12). Cellular Localization: Cytoplasmic and cell/nuclear membrane                                                                                                           |
| Product Description        | Recognizes a protein of 27kDa, identified as the Bcl-X protein. This MAb shows no cross-reaction with Bcl-2a or Bax protein. Bcl-X has two isoforms, Bcl-XL (long), a 241 amino acid protein which suppresses cell death. And Bcl-XS (short), a 178 amino ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [BX006 2H12]                                                                                                                                                                                                                                                  |

|         |                                                                                                                    |
