| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Non catalytic polymerase cofactor and regulatory protein that plays a role in viral transcription and replication. Stabilizes the RNA polymerase L to the N-RNA template and binds the soluble protein N, preventing it from encapsidating non-genomic RNA... |
| Molecular Weight           | 37.3                                                                                                                                                                                                                                                          |
| UniProt                    | <a href="#">P69480</a>                                                                                                                                                                                                                                        |
| Purity                     | 90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a liquid in 10mM Tris-HCl, pH 8.0, 1mM EDTA, 50% glycerol.                                                                                                                                                                                        |
