| Manufacturer               | US Biological                                                                                                                                                                                                                                                  |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                              |
| Product Description        | Cleaves viral precursor proteins (pTP, pIIIa, pVI, pVII, pVIII, and pX) inside newly assembled particles giving rise to mature virions. Protease complexed to its cofactor slides along the viral DNA to specifically locate and cleave the viral precursor... |
| Molecular Weight           | 28.1                                                                                                                                                                                                                                                           |
| UniProt                    | <a href="#">P03253</a>                                                                                                                                                                                                                                         |
| Purity                     | 90% (SDS-PAGE)                                                                                                                                                                                                                                                 |
| Form                       | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                             |
