| Product Description        | 2-Amino-5-iodo-3-methylbenzoic acid is an intermediate in the synthesis of highly potent and selective activator of insect ryanodine receptors. Molecular Formula: C <sub>8</sub> H <sub>8</sub> INO <sub>2</sub> Solubility: DMF Molecular Weight: 277.06 Storage and Stability: Store at -20C.... |
| Molecular Weight           | 277.06                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a Brown Solid                                                                                                                                                                                                                                                                           |
