| Product Description        | 2-Chloro-5-nitrobenzophenone is used as a reagent in the synthesis of bile acid transporter inhibitors in the treatment of atherosclerosis. Also used in the synthesis of antiinflammatory agents. Molecular Formula: C <sub>13</sub> H <sub>8</sub> ClNO <sub>3</sub> Molecular Weight: 261.660... |
| Molecular Weight           | 261.66                                                                                                                                                                                                                                                                                              |
