| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Product Description        | Peroxidase conjugated rgp160 HIV-1 IIIB (Baculovirus). Molar Ratio: 2-4 peroxidase molecules per molecule of gp120. Specificity: Peroxidase conjugated rgp160 IIIB binds to murine monoclonal antibodies of defined epitope specificity and human monoclon... |
| Purity                     | Purified by immunoaffinity chromatography to 95% purity as determined by SDS-PAGE, reduced.                                                                                                                                                                   |
| Form                       | Supplied as a liquid in 50mM Tris, pH 8.0, 1% BSA, 0.01% thimerosal. Labeled with HRP.                                                                                                                                                                        |
