| Category                   | Antikörper                                                                                                                                                                                                                                                     |
| Application                | IHC, WB                                                                                                                                                                                                                                                        |
| Immunogen                  | Nitrated KLH                                                                                                                                                                                                                                                   |
| Product Description        | The cellular production of highly reactive nitrogen species derived from nitric oxide, such as peroxynitrite, nitrogen dioxide and nitryl chloride, leads to the nitration of tyrosine residues in tissue proteins. The extent of protein nitrotyrosine for... |
| Purity                     | Purified by Protein A affinity chromatography.                                                                                                                                                                                                                 |
| Form                       | Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with R-Phycoerythrin (PE).                                                                                                                                                                 |
