| Product Description        | 2-Ethylamine-5-methylthiazole is an intermediate in the synthesis of Amido Ethyl Meloxicam (Meloxicam Impurity). Molecular Formula: C <sub>6</sub> H <sub>10</sub> N <sub>2</sub> S Solubility: Chloroform, Dichloromethane, Dimethylformamide, Dimethylsulfoxide Molecular Weight: 142.22 Storage... |
| Molecular Weight           | 142.22                                                                                                                                                                                                                                                                                                |
| Form                       | Supplied as a Pale Brown Solids                                                                                                                                                                                                                                                                       |
