| Product Description        | Salicylic Acid Acyl Glucoside is a transferrin binding compound used in research for cancer therapy. Molecular Formula: C <sub>13</sub> H <sub>16</sub> O <sub>8</sub><br>Molecular Weight: 300.26 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original v... |
| Molecular Weight           | 300.26                                                                                                                                                                                                                                                                                                 |
