| Product Description        | (S)-N-Methylhydroxysuccinimide-d3 is a labelled analog of (S)-N-Methylhydroxysuccinimide (M312895) which is a Hydroxysuccinimide derivative. Molecular Formula: C5H4D3NO3 Solubility: DMSO (Slightly), Ethanol (Slightly) Molecular Weight: 132.13 Storage... |
| Molecular Weight           | 132.13                                                                                                                                                                                                                                                        |
| Form                       | Supplied as a white to off-white solid.                                                                                                                                                                                                                       |
