| Product Description        | 2-trans-Farnesic Acid Methyl Ester is an intermediate in synthesizing trans-trans-10,11-Epoxy Farnesenic Acid Methyl Ester (E589400), a metabolite (2E,6E)-Farnesenic Acid. Molecular Formula: C <sub>16</sub> H <sub>26</sub> O <sub>2</sub><br>Solubility: Dichloromethane, Ethyl Acetate, Hexane... |
| Molecular Weight           | 250.38                                                                                                                                                                                                                                                                                                 |
| Form                       | Supplied as a Liquid                                                                                                                                                                                                                                                                                   |
