| Product Description        | 2,3,4,6-Tetra-O-acetyl-1-S-acetyl-1-thio-(alpha/beta)-D-galactopyranoside is used in the synthesis and evaluation for iNKT stimulation of alpha-S-galactosylceramide. Molecular Formula: C <sub>16</sub> H <sub>22</sub> O <sub>10</sub> S Solubility: Chloroform (Slightly), Methanol (Slightly) ... |
| Molecular Weight           | 406.4                                                                                                                                                                                                                                                                                                 |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                             |
