| Product Description        | 2,7-O-Bis(triethylsilyl)-D-seco-paclitaxel is an intermediate in the synthesis of Paclitaxel (P132500) related compound. Molecular Formula: C <sub>59</sub> H <sub>81</sub> NO <sub>15</sub> Si <sub>2</sub> Solubility: Chloroform, Ethyl Acetate, Methanol Molecular Weight: 1100.44 Storage and Stability:... |
| Molecular Weight           | 1100.44                                                                                                                                                                                                                                                                                                          |
| Form                       | Supplied as a White Foam                                                                                                                                                                                                                                                                                         |
